

Frays Dental Education (FDE) offers a Foundation Course which covers many of the core requirements of dental nursing and provides students with a taste of dental nursing without the committing to the Diploma Course.

Our courses are based in a state-of-the-art private dental practice, which provides students with access to all clinical resources such as a decontamination room, a full range of dental materials, X-ray developing equipment...in fact all the resources you would expect in a fully functioning dental practice.

Why study for a Foundation Course with FDE?

1. Offers valuable experience and demonstrates commitment

When going for interviews, you will have the experience and knowledge to answer in-depth questions.

Furthermore, you will be able to say that you have enrolled and are completing a Foundation Course in preparation for undertaking the Diploma Course.

2. Try before you buy

The Foundation Course costs much less than the Diploma Course and is a great way to try out dentistry to see if it's for you.

For those applicants waiting to go on to do dental degree courses (such as dentistry or hygiene-therapy), the Foundation Course offers additional experience and insight into dentistry.

It has proved very useful for UCAS applications and for university interviews.

3. **Qualification and experience of our team**

Our team has wide-ranging teaching experience.

Our tutors have taught nurses and post-graduate dentists and most either have, or still are, studying for specialist adult teaching qualifications.

Fees

£800 split over 4 months.
